## **eBlasts Directions**

## **Using Google Chrome**

At this time there is no simiple way to email the contents of a web page using Google Chrome. So you'll need to follow these instructions to the right using another browser like: Internet Explorer, FireFox, Safari, etc.

## **Using other Browsers**

Click on the "Direct Links" above or copy and paste the URL into a open browser and once the page is open follow the directions below:

- In the menu bar Click on "File" > Send page by email
- The web page will open in your email program
- Add your message in the Message Area, your Contact information and email to your mailing list.
